NEW
size 3 and 3 wide

Zitzi Guppy G2

Strong but easy and flexible

Strong but easy and flexible

New sizes!

The new sizes 3 and 3-wide can handle load weights up to 110 kg.

Guppy G2 with
Delfi seating system

Easy to balance

Balance has been a key word throughout development, to be able to combine many different types of seating systems and anatomical seats (individial seats). Balancing is done by simple adjustment of the rear wheel axle.

Universal

Guppy G2 is developed to fit the most seating systems on the market.

Many choice of wheels

The Guppy G2 comes with black non-marking tyres (6", 7" and 16"). For size 1 and 2 we can offer camber angled wheels for easier steering.
Possibility to select wheels with E-drive power assist.

Footrest series

New footrest series that fits all G2 chassis.
The footrests are built on two stays for increased stability and function. These are available in several designs to cover the user's needs.
