Engage. Enable. Empower

Motion-activated experiences for **sensory** and **learning** environments

OM INTERACTIVE

Engage. Enable. Empower

This brochure is designed for schools, specialist providers, therapists, and SEND settings supporting children with additional needs.

The team at **OMi** is proud to lead the way in creating inclusive multi-sensory spaces that encourage active engagement through motion since 2005.

For us, inclusive learning means providing technology that:

- *Enables all ages and abilities to participate*
- *Removes barriers to learning*
- *Values all efforts and contributions*
- *Releases potential and encourages collaboration*
- *Stimulates imagination and Respects diversity*

1. CONTENT SUITES

Our motion-activated projection systems create dynamic images on floors, tables, walls and ceilings, as well as other horizontal surfaces including beds, mats and padded materials.
Every system comes with a comprehensive suite of content designed to support SEND, Autism and wider developmental needs.

SEND SUITE

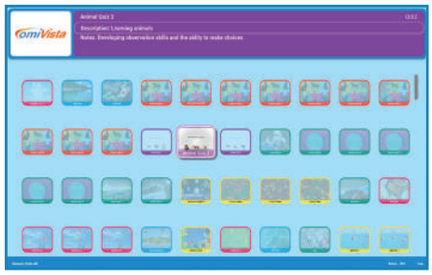

The SEND Suite delivers meaningful, inclusive experiences through interactive activities that support learning, communication, movement and sensory exploration.

Pre-loaded into every omiVista system, it includes **300+ activities**, ranging from calming sensory scenes and music to agility games and cognitive challenges..

SEND SUITE BENEFITS
UNLOCKS POTENTIAL IN KEY AREAS:

- Language development and social interaction
- Independent thinking and self-awareness
- Co-ordination and physical movement
- Cognitive and emotional development
- Sensory regulation and calming
- Improved engagement and attention

AUTISM SUITE

The Autism Suite is an optional content addition designed to support learners across the autism spectrum through structured, predictable and calming interactive activities.

With **200+ carefully designed experiences**, it encourages interaction, flexible thinking and gradual skill progression at an individual pace.

OMi has over 20 years' experience supporting SEND learners, and we continue to develop solutions that meet diverse needs through our interactive systems.

AUTISM SUITE BENEFITS
UNLOCKS POTENTIAL IN KEY AREAS:

- Social interaction and emotional understanding
- Communication skills
- Personal organisation and routine-building
- Flexible thinking
- Gross motor skills and proprioceptive feedback
- Sensory calming and alerting

2. MOBILE SYSTEMS

All OMi portable systems are completely self-contained, require no Internet connection, and come preloaded with our SEND Suite of engaging activities. Designed for flexibility and ease of use, they bring immersive interactive experiences directly to the people who benefit most - **wherever they are.**

omiVISTA MOBII

Mobii provides a bright, powerful, large projection that supports everything from 1:1 interaction to small-group and larger shared sessions. Simple to adjust and easy to move, it brings engagement to any space.

omiVista Mobii

Key Benefits

- Large, powerful projection area ideal for group engagement
- Floor and table use with a single system
- Height-adjustable for different user groups
- Great movement range and physical exploration
- Supports full-class or multi-learner sessions

Pre-loaded with 300+ SEND activities

Package Options	What's Included
Mobii	SEND Suite (includes **300+ activities**)
Mobii +	SEND Suite + **Editability**
Mobii Gold	All of the above + **Smart View** + Includes **3 out of 6 games:** (Catch Games • Ball Games • Double Splat • Puzzle • Sort Pro • Match Games)
Mobii Platinum	All of the above + **all 6 games**

"The Mobii provides a really useful tool to mitigate all of those difficulties and barriers to learning."

Lynnette Johnson, Headteacher - Lakeside School

BUDII FLIP

Budii Flip offers a versatile sensory experience in any environment.

Its unique flip design lets you project onto the wall, floor, table or ceiling - ideal for 1:1 or small-group learning, therapy and calming sessions, especially in smaller spaces.

Budii Flip

NEW

Key Benefits

- Floor, table, wall and ceiling projection
- Best choice for small spaces
- Portable and easy to wheel between rooms
- Perfect for 1:1 or small-group interaction
- Highly responsive interactive surface for movement and physical engagement
- Ceiling ambient displays for relaxing, soothing downtime
- Ideal for bedside and low-mobility users

Pre-loaded with 300+ SEND activities

3. FIXED SYSTEMS

Our fixed systems provide an always-ready interactive sensory experience.
Mounted neatly on the ceiling or wall, they create clutter-free spaces and project engaging motion-activated activities onto the floor or table at the touch of a button.

omiVISTA INSTALL

omiVista Install

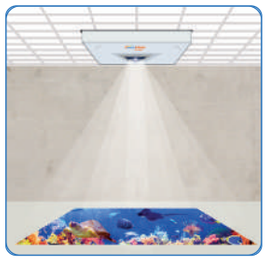

Key Benefits

- Always ready to use – no set-up, storage or preparation required
- Fixed ceiling-mounted design keeps floors and tables clear and accessible
- Projects onto floor or table at the touch of a button
- Maintenance-free laser projector – ideal for high daily use
- Safe, tamper-free installation with no loose cables or movable part

Package Options	What's Included
Install	SEND Suite (includes **300+ activities**)
Install +	**All of the above + Editability**
Install Gold	All of the above + **Smart View** + Includes **3 out of 6 games:** (Catch Games • Ball Games • Double Splat • Puzzle • Sort Pro • Match Games)
Install Platinum	**All of the above + all 6 games**

For more details, visit **omi.uk/install-packages**

omiVISTA BUDII

omiVista Budii

Key Benefits

- Compact wall- or shelf-mounted design
- Always ready to use
- Perfect for 1:1 or small-group interaction
- Great solution for personal or quieter sensory environments

Package Options	What's Included
Budii	SEND Suite (includes **120+ activities**) + **Ball Games** + **Catch Games**
Budii Gold	All of the above + **Smart View** + **Double Splat Game** + **Editability**
Budii Platinum	All of the above + **Puzzle** + **Sort Pro** + **Match Games**

For more details, visit **omi.uk/budii-packages**

4. INTERACTIVE WALL PROJECTION

Interactive wall projection transforms walls into engaging, motion-activated learning and sensory spaces.

Users interact through touch and movement, creating immersive experiences that encourage participation, exploration and collaboration across a wide range of abilities.

omiWALL

omiWall

Key Benefits

- Co-ordination/motor-skills development
- Group collaboration and problem-solving
- Removing barriers to learning
- Therapeutic calming activities
- Stimulating physical and mental development
- Encouraging active participation

Pre-loaded with 300+ SEND activities

Package Options	What's Included
omiWall	SEND Suite (includes **300+ activities**)
omiWall +	**All of the above + Editability**
omiWall Gold	All of the above + **Smart View** + Includes **3 out of 6 games:** (Catch Games • Ball Games • Double Splat • Puzzle • Sort Pro • Match Games)
omiWall Platinum	**All of the above + all 6 games**

For more details, visit **omi.uk/omiwall-packages**

omiREFLEX

The omiReflex projects the user into their chosen activity, with ‘floating’ objects that they can interact with, e.g. scattering leaves/petals, popping bubbles, and bouncing spacemen. Projection onto any pale, vertical surface.

The omiReflex+ version is fully customisable allowing users to import their own images, sounds, and videos.

omiREFLEX INSTALL

omiReflex Install

Key Benefits

- Always-ready, fixed-wall installation
- Designed for shared and group interaction
- Supports therapeutic engagement
- Customisable with omiReflex+ content

omiREFLEX MOBILE

omiReflex Mobile

Key Benefits

- Portable system for flexible use
- Ideal for 1:1 and small groups
- Encourages physical engagement
- Supports motor skills and sensory feedback
- Suitable for therapy and exercise sessions

5. CEILING PROJECTION

Projects a moving image of the user on a ceiling, with 'floating' objects that users can interact with, e.g. scattering leaves/petals, popping bubbles and bouncing spacemen.

The omiSky+ version is fully customisable, allowing users to import their own images, sounds and videos.

Ask us for more details

omiSKY

omiSky

Key Beneficiaries

Users who:

- Have limited movement
- Benefit from interactive therapeutic input
- Require vestibular input
- Need proprioceptive feedback
- Benefit from kinaesthetic learning

"With very little movement of a child's head or feet they get an immediate response. Being able to change the content means we can keep children continually interested"

Jonathan Morgan, Headteacher, Ysgol y Gogarth Llandudno

6. ROOMS SOLUTIONS

The omiBeam is a system of coloured light beams installed in the ceiling, creating interactive wall projections with pop-up images, sound effects and music.

Any interaction within a beam delivers an instant reward, encouraging movement and engagement. Systems can be installed with **4 or 8 omiBeams** and support up to **six projectors**, enabling three fully interactive walls.

omiBEAMS INTERACTIVE-LIGHTING SYSTEM

omiBeam

Key Benefits

- Supports up to six projectors
- More than 60 settings
- Fully editable software
- Need proprioceptive feedback
- Benefit from kinaesthetic learning

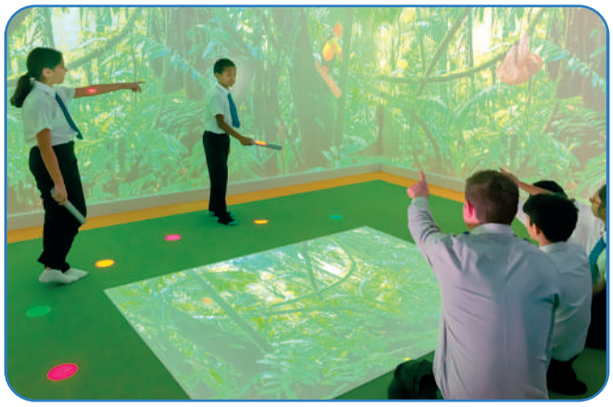

IMMERSIVE INTERACTIVE ROOMS

omiRooms are fully interactive, multi-sensory environments that immerse learners in stimulating visual and audio scenes. They are accessible for all ages and abilities, with activities tailored for both groups and individuals.

Each room includes interactive walls, floors and ceiling projections with LED mood lighting, all controlled easily via the omiPad tablet.

For further information please visit www.omi.uk/omiRoom

More than 60 themed interactive-room settings

Example themes:

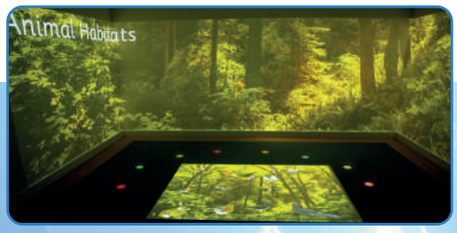

Egypt

Ocean

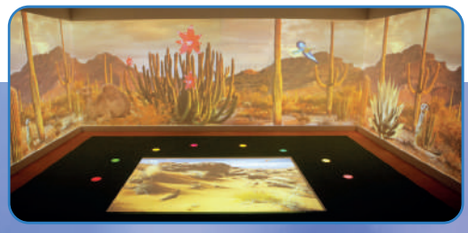

Celebrations

Woodland

Space

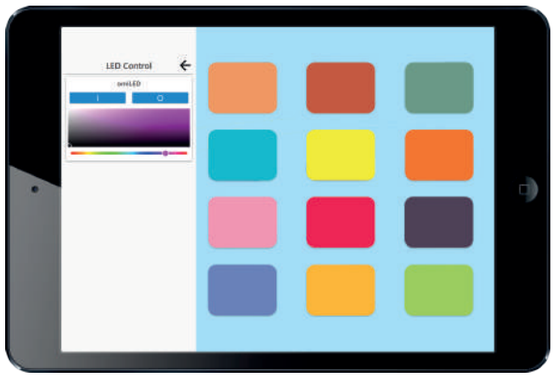

Desert

Visit www.omi.uk for more information

omiLED

omiLED is a lighting colour-wash system that transforms a room at the touch of a button.

It changes any space into a vibrant, and dynamic learning zone, with a kaleidoscope of subtly morphing hues.

COLOUR WASH CAN BE USED TO:

- Visually enhance a theme or topic
- Create a therapeutic space
- Enhance mood and energy
- Work on sensory receptors
- Aid creativity and boost imagination
- Alleviate physical and emotional blocks
- Encourage choice and independent thought

There are many automated preset-programmes to choose from. The control switch can be wall mounted or wireless, creating a fully immersive experience.

"We had a sensory room designed by OMi two years ago. It has become the most popular activity with our service users and is always booked"
Jon Carr, Team Manager, Hyndburn Adult Disability Day Services

LUMATONE

An all-in-one interactive light and audio system designed for calming, engaging sensory experiences.

Key Features:

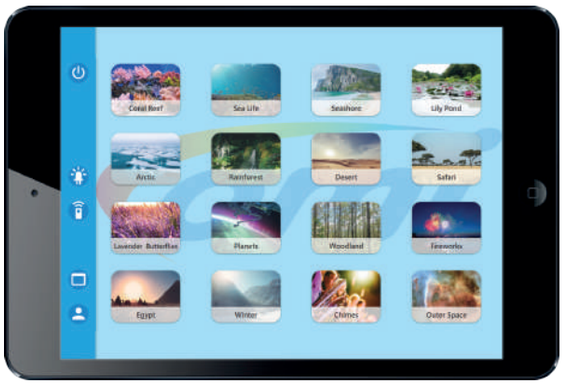

- Light and music themes triggered with a simple tap
- Immersive presets including nature, relaxation and more
- Anti-ligature enclosure ideal for secure environments
- Safe, simple and intuitive to use
- User configurable for personalised sensory sessions
- Low maintenance for everyday use
- Versatile – works well in sensory rooms, therapy spaces and calming areas

ROOM CONTROL SYSTEMS

The integrated set of devices allow simple, but effective control over all installed systems.

The omiPad touch-screen controller enables the facilitator to quickly set the room theme across all our systems at the same time.

Examples:

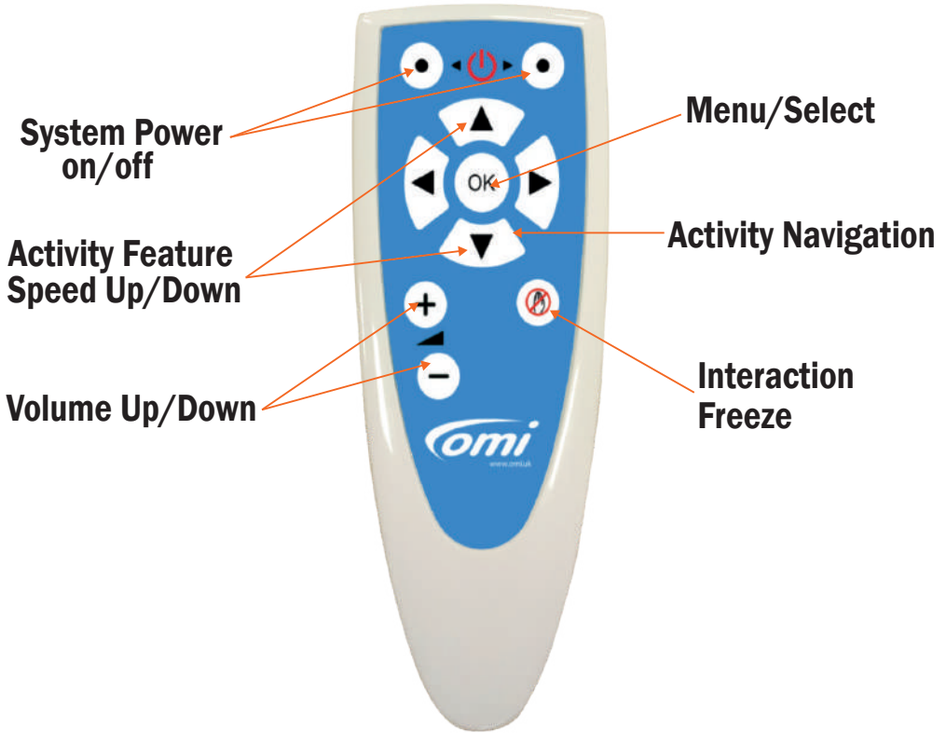

- Blue walls/ceiling colour wash
- Marine animals on the walls
- Coral reef pool on the floor
- Whale/dolphin sounds and videos

GIVES USERS THE OPTION TO:

- Control the system by switches/buttons, or another tablet (i.e. iPad)
- Trigger sounds/images/music without need for physical interaction
- Ensure the system saves energy when not in use

7. EASY-TO-USE REMOTE

omiControl - Instant on/off control, system volume, and activity selection

8. TRAINING

We offer extensive training so clients get the most from their systems, including:

- Hand-over training - provided as part of system delivery/installation
- Advance training - an optional half or full-day on-site training
- Online video tutorials - a vast resource available to all our customers

9. WARRANTY AND SUPPORT

All our systems are supplied with a comprehensive 12-month warranty, with options to extend the warranty by up to 36 months. We will make contact before your first installation anniversary to discuss options.

Annual service

The first step to ensuring your system continues to perform as safely and faultlessly as the day it was purchased.

The service is designed to reduce potential downtime, and prolong the life of the system. Includes an extensive list of safety, operational tests, maintenance tasks, and software updates.

Support

- Telephone, on-line and on-site support using a fully trained team of OMi engineers (applies in England and Wales) and specialists in the field of education.
- We aim to provide on-site support within five working days for warranty claims from notification/diagnosis of fault.
- Services provided 9am to 5pm Monday to Friday, UK time.

Extended warranty

Optional cover providing peace of mind, and protection against potentially expensive repair bills. The warranty covers all parts and on-site support, and includes a comprehensive annual service.

Options Offered:

1 or 3 years on-site or back to base.

(Depending on system)

10. BOOKING A FREE ON-SITE DEMO

We are happy to bring our systems to your school or centre for a demonstration. This is a fantastic opportunity to use and understand first-hand how our technology works and the potential benefits. It gives you an opportunity to engage your pupils/service users/clients and assess their reaction, explore the content, and learn how to use it. Ideally involve key staff members to get feedback on the system.

All we require is 60– 90 minutes of your time, a room with some free floor space (with a power outlet), and a space away from bright windows.

After the demo we discuss your requirements, look at potential locations to install the system, and conduct a free site survey. We follow up with a proposal for your consideration. Where required, we can produce a free room design.

VIDEO DEMOS

For your convenience video demos are now available using Zoom or Teams

Book a FREE on-site demo: info@omi.uk

ROOM-DESIGN SERVICE

At OMi we pride ourselves in providing tailored room solutions that:

- Meet the varied needs of our clients.
- Offer the latest interactive, gesture-driven projection systems.
- Provide high-quality atmospheric lighting & sound systems.
- Incorporate traditional sensory equipment such as bubble tubes/fibre optics...
- Offer centralised control at the touch of a button.

Our design service and accompanying visuals are completely free of charge.

OMi can also work with your building contractor, designer, or architect to provide drawings and electrical specifications to ensure the design process is seamless, ensuring a superior end result.

WE ARE EXPANDING

Our new manufacturing facility means we have increased efficiency, and optimised in-house production.

AS SEEN ON ITV NEWS: JAKE'S STORY

Jake's story - recently featured on **ITV News Meridian** - highlights how interactive sensory technology can make a meaningful difference for autistic learners and those with additional needs.

Through personalised sensory activities and engaging visuals, Jake experiences greater focus, motivation and joy during his daily routines.

His journey shows how omiVista systems can gently support emotional regulation, communication and confidence in an accessible, reassuring way.

OUR CHARITIES

Giving back matters to us. OMi actively supports a range of charities each year through fundraising and community-led initiatives.

National Autistic Society

CANCER RESEARCH UK

DementiaUK

Rennie Grove Hospice Care
Care based around you
Corporate Patron

Please call us to find out more about our products and services, and we will be happy to talk you through the options available, and arrange a free on-site demonstration.

We also offer a free room design service, and detailed proposals.
Please visit our website for more details!

21 YEARS 2005 - 2026

www.omi.uk

OMi Ambassador **Noah Wall**

Noah's journey from just 2% brain function to becoming a confident, curious and determined young boy has inspired millions. After appearing on BBC's DIY SOS, he began using our interactive sensory floor to support movement, communication and learning.

His progress has amazed medical experts, and his story continues to inspire our mission to create inclusive, empowering sensory experiences for all learners.
