FLIPPER G2

Zitzi Flipper G2

Hi-low Indoor underframe

Can handle higher loads

The Zitzi Flipper G2 is also suitable for large users.
The maximum load weight is 130 kg for the largest size!

Manual or electric height and tilt adjustment

Flipper G2 is available with manual or electric height adjustment. It is also available with electric tilt adjustment.

Manual height adjustment with foot pedal

Improved tilt placement

On the Flipper G2, the tilt gaspiston is attached centered under the seat, which provides increased stability and better force distribution on the chassis.

Different handles

Flipper G2 can be fitted with several different types of handles depending on needs and wishes.

New footrests

The Flipper G2 has a new series of footrests that fit all G2 chassis.
They all have two stays and are available in several different designs depending on need and function.
